Dojo Go - Virtual Queues & Bookings

SEE YOUR REVENUE GO UP & NO-SHOWS GO DOWN with dojo

A new all-in-one booking system that lets you seamlessly manage your restaurant flow – is now available from our partners, Dojo.

That's walk-ins, queues and bookings – all from the same place. Plus, you can connect to even more diners thanks to our Reserve with Google integration.

| Increased Revenue | Quick Setup | Online Bookings | Wait Time Algorithm |

Manage Peak Demand

Ditch the peak-time chaos once and for all. From app users to walk-ins, your customers can join the queue virtually and get a text when their table is ready.

No More No Shows

Punctual diners are rewarded with a bigger search radius — so they can discover your restaurant from up to 5km away. With benefits like that, up to 85% of customers show up on time for their table.

Pack Your Place Out

Sure, users can book a table straight from the app — but now we also integrate with Reserve with Google. Meaning even more diners can discover and book your restaurant as they search for their next meal out on Google Maps.

The Best Restaurant Booking Systems Empower Your Staff to Work Smarter!

- **You're running a busy restaurant.** Stay on top of your peak times and be more efficient. Dojo's system displays all bookings, walk-ins, waitlists and queues you might have going for an easy-to-manage view.

- **You're a small restaurant owner.** Put your restaurant on the food map and enjoy some extra exposure – without extra effort from you. A restaurant listing on Dojo's consumer-facing app means more eyes on your menu. And that could quickly translate into more covers.

- **You want to empower your staff to work smarter.** Give your staff a helping hand – Dojo's platform is easy to use; anyone in your team will be able to start seating guests without extra training involved. So they can spend more time on excellent customer service and less on frustrating admin.

How Booking Management Can Help You And Your Business

The restaurant booking system software is quick and easy to set up, so it can be used by anyone in your business. No complicated tech knowledge required, so there's no need to be a super experienced host.

Plus, the software gives you the ability to provide customisable emails that let diners easily communicate with you – be it on special occasions, booking amends or cancellations.

Drive Hungry Diners To Your Empty Tables

When business slows down, Dojo's software can assist you in attracting hungry customers to your vacant tables.

Offer exclusive deals through their innovative consumer app, which is used by thousands of users searching for their next dining experience, you can ensure a steady flow of customers. It's time to keep the customers coming.
