Save time with intelligent automation

By utilising TouchPoint, you can enhance your efficiency by avoiding errors and saving time. The program can prompt your employees to recommend additional items, alert them of potential allergens, and provide age verification reminders for restricted product sales or door entry. This will reduce your workload and allow you to focus on providing unparalleled customer service.
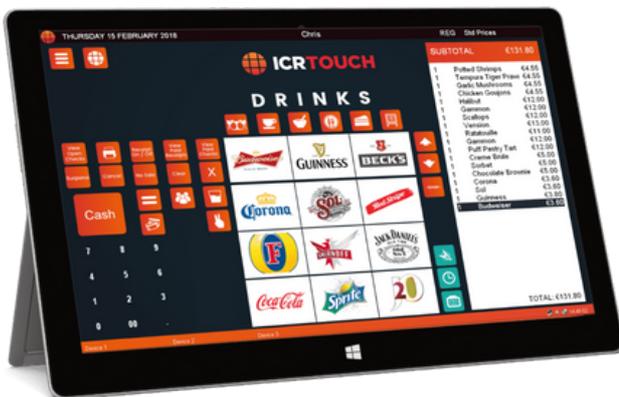

- ✓ Automatically Split Bills
- ✓ Schedule Happy Hours
- ✓ Built-in Language Translation
- ✓ Product Image Buttons
- ✓ Payment Card Reader Integration

Built-in security reduces fraud and theft

To aid in investigating any incidents, TouchPoint comes equipped with a comprehensive audit trail of all clerk activity and transaction data. For even more detailed reports, TouchOffice Web, a cloud-based business management software, can be seamlessly integrated.

With its innovative integration of CCTV technology to display transactional information and the ability to customise clerk sign-on with various methods such as fingerprint scanners, ibuttons, cards, or pins, TouchPoint is designed to deter, detect, and ultimately decrease the potential threat of internal theft and fraud.

- ✓ Identity Verification
- ✓ CCTV Integration

ICRTouch
All-in-one EPOS Solution

More features to help you raise the bar

- **Graphical table plans**
  Visual representation of service areas with multiple levels and numbered tables.

- **Clerk language selection**
  Change the language per till operator.

- **Product image buttons**
  Easily identify products with images without needing to read text.

- **Kitchen order translation**
  Orders can be printed or displayed in the kitchen in a secondary language.

- **Clerk language selection**
  Change the language per till operator, or have a different language to the kitchen.

- **Prompts to upsell**
  Create upselling suggestions when specific products are selected or sold.

- **Stock count on sales screens**
  Show stock quantities on product buttons for specials and limited quantity items.

- **Split bill automation**
  Take the pressure off staff and automatically calculate split bill values.

- **Inhibit sales of low stock**
  Prevent sales of products when their stock limits are reached.

Capturing useful marketing information has never been easier

- **Points schemes**
  Collected on value of a sale, or on specific products for a discount or in exchange for a product.

- **Flexible discounts**
  Change the language per till operator.

- **Loyalty pricing levels**
  Shift to a different price list for product-specific discounts.

- **Photo ID verification**
  Ensure that loyalty cards are used by the right person with photo verification.

- **Gift cards**
  Create gift cards of any value.

- **Cashless environments**
  Add funds to an account for cashless environments.

Work smarter with EPoS solutions, custom-built for your business

Whether you're a restaurant owner putting customer experience first, accommodation start-up searching for a Micromerchant account on your first EPoS system, a busy takeaway looking to integrate existing sales platforms like Deliveroo and Just Eat; or even a convenience store looking to quickly manage stock lines, the suite of scalable ICRTouch software products can be combined to create a secure ecosystem to suit your needs.
