

Dojo Go

# THE NEXT CHAPTER OF MERCHANT SALES

Introducing the Go by Dojo — the magical card machine that'll leave you feeling like you're floating on a cloud of sales. This sleek little device is the answer to all your payment woes, and it's here to transform the way you do business.

Whether you're peddling wares at a market, doing business from your trailer or running a pop-up shop in a field. This nifty little machine is as light as an iPad and as powerful as a rhinoceros. It's got 3G and 4G connectivity, so you can make transactions anywhere you please.

-   
Faster Transactions
-   
Next day Transfers
-   
5" LCD Screen
-   
Touch Screen
-   
Smartphone App

The Go by Dojo is designed to move with you and your business. It's got lightning-fast payment capabilities, which means you can whizz through sales faster than a speeding bullet. Whether you're selling vintage records, handmade jewellery or organic cupcakes, the Dojo Go has got you covered.

*This little gem will make your life so much easier — you won't even believe it.*

Say goodbye to clunky old payment systems and hello to the future of sales. 😊

### Features

Features	Connections
Display	5" HD touchscreen
Printer	Included 57mm x 40mm x 12.7mm Thermal Rolls
Battery	10 hours' battery life
Connectivity	Wi-Fi 802.11a/b/g/n/ac 3G 4G

### Add-ons

## BUSINESS IN THE FAST LANE

Dojo is a sub-company of Paymentsense, with its main offering being the Dojo touchscreen card machine that can be used on the go, at the till or around premises.

It accepts contactless and chip card payments of the brands Visa, Mastercard, Discover, Diners Club and American Express and the mobile wallets Apple Pay, Google Pay and Samsung Pay.

## CONNECT AND CONQUER

### Seamless EPOS Integration

Business is all about making the right connections. And integrated payments is too. It uses cloud-based software to seamlessly link your card machine to your EPOS system – so it's goodbye mis-keying mistakes and hello to smoother and faster transactions. With your card machine and EPOS system connected wirelessly in the cloud, there's no need to enter the transaction amount twice.
