

UniFi Access Control

We can provide, install and maintain market-leading, high-quality access control and door entry systems to suit your needs, whether in a building, across an entire site or just for controlled zones, our systems are dependable, innovative and secure.

ABOUT US

CCR Systems was founded in 1982 as a supplier of cash registers and monetary transaction management solutions. Today, we're a leading supplier of EPOS systems, CCTV systems and Access Control systems, VoIP Phones, Managed Print and IT Support across a wide range of business industries.

Operating on a nationwide scale, catering to a diverse clientele spanning education, healthcare, retail and hospitality industries.

The CCR Systems brand was acquired and integrated within the Excel Connect Solutions Ltd portfolio in early October 2022.

From bustling city centres to remote island landscapes, our solutions empower hundreds of businesses across the UK and even the Falkland Islands.

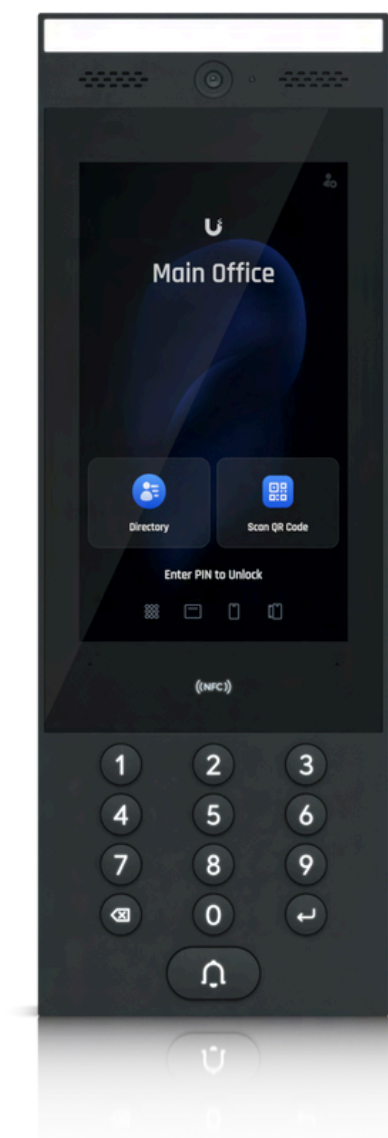

Best in Retail & Hospitality EPOS Systems 2024 at the Global Business Insight Awards 2024.

Leading Providers of Retail & Hospitality EPOS Systems 2023 at Acquisition International Magazine's Global Excellence Awards.

Minimal footprint with separated lens

Optional AI Theta Audio module for two-way audio

PoE powered hub that connects to lens

Unlock with NFC,
PIN, App or QR Code

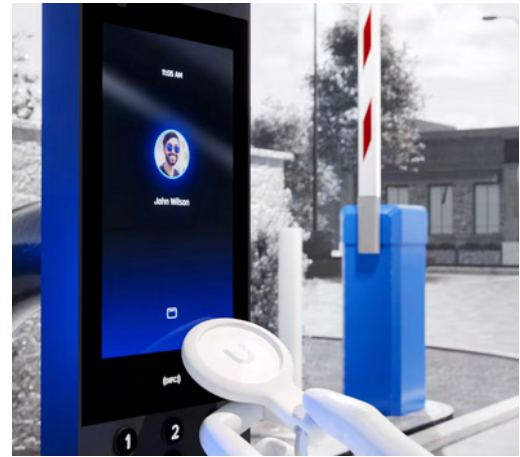

Pairs with multiple UniFi devices
for complete remote control

Gate Access System

Control a vehicle gate using the connected Intercom and authorise gate access with License Plate Unlock when paired with a compatible Protect AI camera.

Ubiquiti's UniFi Access represents a cutting-edge access control system driven by native Power over Ethernet (PoE) technology. This system accommodates traditional electric bolts, magnetic locks, and various 12V access peripherals like motion sensors, push buttons and alarms.

Two-way Audio

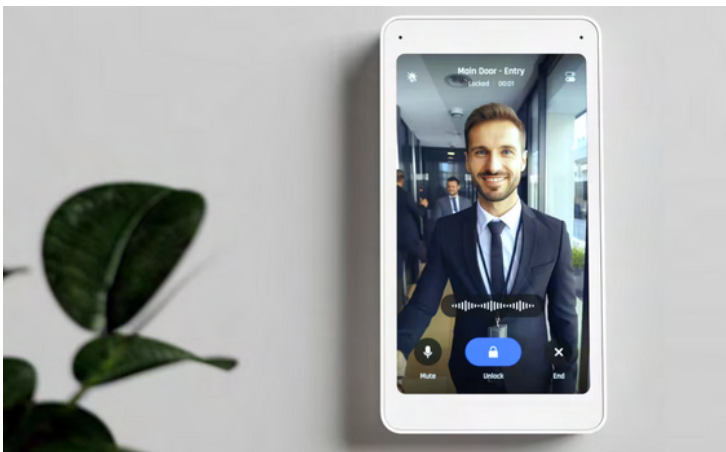

Instant live view

5" touch display

Intercom Viewer

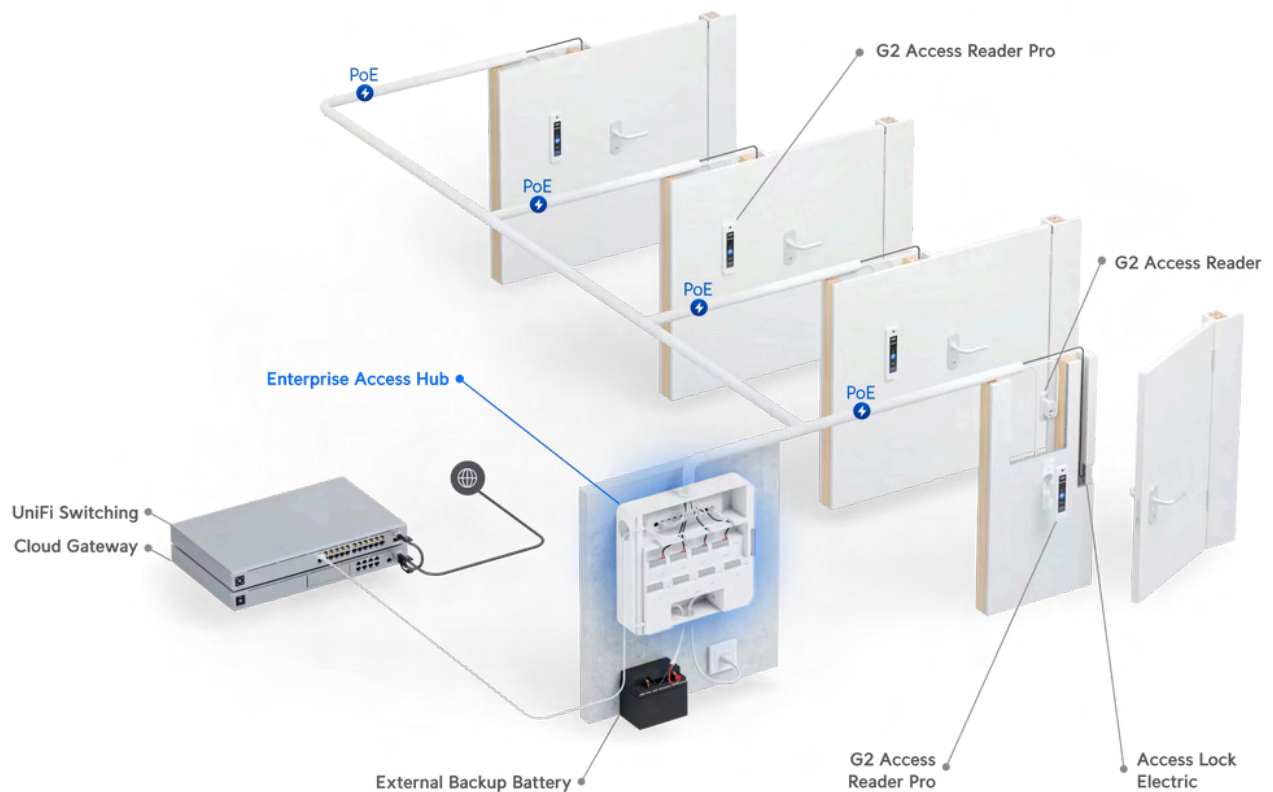

Display that pairs with the Access Intercom for visitor screening and remote access control, to mount in multiple locations throughout your building.

Typical Configuration with Access Hub
